# 1. Alternate sources of energy and energy conservation measures

## 1. Policy document for energy usage

# POLICY DOCUMENT FOR ENERGY USAGE

VIPER follows energy usage policy which is designed for systematic energy management to minimize its impact on the environment. The policy implies to identify alternative natural renewable energy resources to reduce the burden of cost as well as pollution and to find out answer to the impending energy crisis. The college believes in reducing the consumption of electricity produced by non-renewable resources by switching to renewable energy sources like solar energy for purpose of electricity requirement of the campus. We commit to install and use environment-friendly electrical appliances that help to save energy. The college uses power saving equipment's such as LED lighting, energy efficient equipment's and electronic appliances like CCTVs, Computers etc.

Natural renewable energy sources like solar energy have remarkably reduced the electricity bills of the campus to the negative side.

**Policies:**

- To install energy efficient energy lights LEDs in entire campus, to lower energy consumption, decrease maintenance costs and to save the energy and expenses.
- To prefer regular use of energy efficient equipment's over conventional equipment's.
- To conduct regular energy audits and follow the instructions and advices given by auditing agency.
- VIPER has installed 3 phase solar rooftop power plant of capacity 10 KWP.
